Work Experience

Trainee Software Engineer (Internship)

Feb 2026 – May 2026

Inventeron Technologies and Business Solutions LLP, Bengaluru

- Engineered 3+ responsive frontend modules using **HTML5, CSS3, JavaScript, Bootstrap** — SPA, CAPTCHA widget, and registration form — reducing page load time by ~20% via client-side validation and Performance Optimization.
- Integrated external **RESTful APIs** via Fetch API, dynamically rendering live data on UI and cutting manual data-entry effort by 40%.
- Collaborated in an **Agile/Scrum** team using **Git/GitHub** for version control; delivered clean, modular, reusable code across 5+ projects with zero critical defects.

Projects

Task Manager App – MERN Stack

2025 – 2026 GitHub

- Stack:** React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, JWT — architected and deployed a full-stack task management application with JWT-based authentication, protected routes, and complete CRUD functionality for task management.
- Implemented task workflow management with **Todo, In Progress, and Done** stages; developed responsive interfaces with real-time updates to improve task organization and user productivity.
- Deployed the frontend on **Vercel** and backend on **Render**, integrating MongoDB Atlas for scalable cloud data management and strengthening full-stack deployment and REST API development skills.

WildGuard – Smart Wild Animal Alert System

Jan 2025 – Dec 2025 GitHub

- Stack:** YOLO, Python, Firebase, GPS, Android Studio, Git — achieved 92% real-time animal detection accuracy via AI object detection on device camera.
- Delivered **GPS-based** push notifications (1000m radius) and one-tap emergency calls, cutting response steps from 5 to 1 (60% faster); gained hands-on experience in IoT integration and real-time alerting systems.
- Added multilingual support (3+ languages) and a nearby hospital locator; expanded usability for 500+ rural users and developed **cross-platform mobile development** and community-focused UX design skills.

DigiTip – A Tap for Every Tip

Sep 2024 – Dec 2024 GitHub

- Stack:** Kotlin, Firebase, Android Studio, XML, Git — digitized hotel tipping via QR-code scanning, enabling cashless ordering and real-time transaction tracking; processed 100+ daily transactions.
- Enforced **role-based access control** (admin, waiter, manager) using **Firebase Authentication & Firestore**, eliminating 100% of unauthorized access incidents; deepened Android development and secure authentication skills.
