## PROFESSIONAL SUMMARY

Computer Science Engineering graduate (CGPA 8.51) skilled in full-stack development, software testing, Android development, and real-time applications. Proficient in MERN stack, Java, Python, SQL, Firebase, and modern development tools. Seeking a Software Engineering or QA role.

## TECHNICAL SKILLS

|                          |                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------|
| <b>Languages</b>         | Java, C, Python, JavaScript, SQL, HTML, CSS                                                     |
| <b>Frontend</b>          | React, Vite, Tailwind CSS                                                                       |
| <b>Backend</b>           | Node.js, Express.js, Flask                                                                      |
| <b>Databases</b>         | MongoDB (Atlas), MySQL, Firebase Firestore                                                      |
| <b>Testing</b>           | Manual Testing, Test Case Design, Bug Reporting, Regression Testing, Selenium (Basics), Postman |
| <b>Tools &amp; Cloud</b> | Git, Android Studio, VS Code, Vercel, Render, Firebase, YOLOv8                                  |
| <b>Soft Skills</b>       | Analytical Thinking, Attention to Detail, Communication, Adaptability                           |

## INTERNSHIP EXPERIENCE

**Trainee Software Engineer Intern — Invention Technologies & Business Solutions LLP** Feb 2026 – May 2026

- Participated in end-to-end software development workflows including debugging, testing, version control, and collaborative development.
- Strengthened practical knowledge of software engineering principles and problem-solving through industry-oriented assignments.

## PROJECTS

**Task Manager App — MERN Stack** 2025 – 2026

- Built and deployed a full-stack task management application using React, Node.js, Express, and MongoDB Atlas.
- Implemented JWT-based authentication, protected routes, and full CRUD task management with task stages: Todo, In Progress, and Done.
- Developed a responsive UI with real-time updates; deployed frontend on Vercel and backend on Render.
- *Tech Stack: React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT.*

**WildGuard — Real-Time Wildlife Intrusion Alert System** 2024 – 2025

- Developed an Android safety application detecting wild animals in real time using a YOLOv8 model trained on 20,000+ images (92% accuracy).
- Integrated Firebase backend with push notifications, alarms, and text-to-speech alerts for immediate driver response.
- Performed functional and system testing across Android app, Python backend, Firebase database, and image hosting services.
- **Achievement:** First Place at JnanaSangama 2025 National Level Conference.

**DigiTip — Digital Cashless Tipping Platform** 2024

- Developed a QR-code-based digital tipping platform for hotels and service workers using Firebase Firestore.
- Verified split-payment workflows, form validations, error handling, and real-time database updates through rigorous manual testing.

## EDUCATION

**B.E. in Computer Science and Engineering** 2022 – 2026

*Vivekananda College of Engineering and Technology, Puttur* CGPA: 8.51

**Class XII (PCMC) — SDM PU College, Ujire** 92.3%

**Class X — Blessed Kuriakose English Medium School** 92.8%

## CERTIFICATIONS & ACHIEVEMENTS

- NPTEL Elite Certification — Software Testing
- First Place — JnanaSangama 2025 National Level Conference
- Deloitte Data Analytics Job Simulation — Forage
- Database and SQL Certification — Infosys Springboard
